**Work Item Charge:** Review API 5CT date of manufacture markings and recommend changes to align with other standard requirements and provide more clear marking for overlap period.

**Ballot Rationale:** Current API 5CT marking for manufacturing date conflicts with standard API monogram date and API 5L. This item is to review and better align the marking format to have a standard marking that does not conflict with other requirements.

**NOTE** Refer to the ballot notification for additional information.

**Ballot Content Below:**

11.1.9 Products manufactured in accordance with this edition of API 5CT during the period of overlap of application with the previous edition shall be identified by using either “0” as the overlap period designation rather than the quarter, or “00” as the overlap period designation rather than the month. The overlap period designation “0” or “00” including the edition number after the manufacture date separated by a hyphen (dash) or slash (e.g., 10th Edition during 9th Edition applicability, 05-19-10ED or 05/19/10ED for 10th Edition). Once the new edition is effective, marking of the edition is not required. The edition marking applies to the pipe body characteristics and does not apply to changes in API 5B.
