After reviewing API Ballot 3237 “API 1509, Annex C Developing New Engine Oil Performance Standards for API Certification Mark” sent on April 21, 2014, we have determined that the changes should be handled in accordance with API’s Standards Procedures paragraph “7.5.6.2 Recirculation.” As a result the ballot has been closed and you will not have the ability to comment or vote through API’s balloting website.

Under “Recirculation,” lubricants Group members need only respond to this email if they wish to revise their previous vote on Annex C in response to the changes included in the attached document. Please review the changes and reply by May 25, 2014, to Dennis at bachelder@api.org if you wish to change your “affirmative” Annex C vote. No action is necessary if you have no objections to the changes.
